**3Z, POLAND** (More info to add to [OPDX.443](#)). Ed, SP1MHV, informs OPDX that "each member" of the Polish Amateur Radio Society (PZK) can use the special **3Z prefix** to celebrate the **70 years of PZK and the Millenium Year 2000**. Each member can use the 3Z prefix plus their call area and own suffix (example - SP1MHV will use the special callsign 3Z1MHV, SP8MI will use 3Z8MI, etc.). Ed, SP1MHV, states that he will use his special contest callsign "3Z1V" for the whole year 2000. Look for 3Z1MHV and 3Z1V to be active on the digital modes (RTTY,PSK and SSTV), and 3Z1V during the major contest on CW/SSB (if he has free time of course). QSLs for Ed are ok via the normal callsign - SP1MHV (the bureau or CBA).

## QSL INFO AND NEWS.....

- Merv, K9FD, QSL Manager for **BY1QH**, reports the following to OPDX: "I just mailed over 10 pounds of QSLs to the bureau. And just received another package from the bureau of several hundred cards. Some of these cards are dated from 1991, not sure if they are old cards stuck in the bureau or just finally being sent, all will be answered in the next few weeks via bureau.. I send cards out to the bureau 2 times a year so be patient.. All direct cards are up to date..and replies are within one week.. There is a new "chief operator" in charge at BY1QH so not sure how much longer will be able to manage their cards.. .... Thanks 73 Merv K9FD"
- Philippe, FK8VHU, has made 600 QSO with the callsign **TY/FK8VHU** during his last stay in December. QSL to his home address at: Philippe Honore, 361 Avenue de l'Hautil, F-78955 Carrieres sous Poissy, France. ADDED NOTE: Some may remember working Philippe as TYD11 which was the first callsign he ever received from Benin (remember TYA11 many years ago!).
- Doug, N6RT, reports that the following new/updated logs are now online at:

- Frederick, AA4NG, has been receiving QSLs for a recent **VP4W** operation which he is NOT the QSL Manager for. However, he is the QSL Manager for a VP4W operation that took place in 1991.
- The QSL route for the millennium operation of **G4FRE/2K** and the **ARRL RTTY Contest operation of M2I** (Mike 2 Italy) are both via WW2R only.

**VP6, PITCAIRN ISLAND.** Remember that Jukka, OH2BR, will leave for Pitcairn Island (**OC-044**) January 19th for **three months**. He is scheduled to return in early May. He will operate on CW/SSB/RTTY on 160-6 meters signing **VP6BR** from Tom's, VP6TC, QTH and/or from the club station VP6PAC on the top of a hill. Jukka plans to also make a few IOTA stops/operations to **Henderson Island (OC-056)** and **Ducie Island (OC-182)** (if it can be possible and reasonably done). QSLs via OH2BR, Jukka Heikinheimo, Box 37, SF-01361 Vantaa, Finland. Cards will be answered after his return. For further information check the Web page at:  
<http://www.qsl.nt/oh2bre/>

**XZ0A DXPEDITION TO MYANMAR.** This major DXpedition is now very active on all bands. OPDX InterNet Subscribers will receive the press release as additional bulletins. Activity is scheduled to last **until February 6th**. Just a couple of points to note. There are no plans to have on-line checking for the XZ0A operation. The QSL Manager W1XT has no logs, so please don't ask him to verify your QSO. AS PER A PRESS RELEASE by Dick, N6FF, "If you have any doubt of a good QSO, please work them again to be certain. The operators will not get upset with a dupe QSO." Bob, W1XT, has posted a Web page about the QSLing for XZ0A. It is located at:

<http://www.superphoenix.com/xz0a-qsl.htm> It gives the current QSL address and details of the XZ0A operation as it applies to QSLs. Additional details can be found on the DXpedition web site at: <http://www.getnet.com/~k7wx/myanmar.htm>

**ZK2, NIUE.** William/W7TVF and Al/K7CA are planning an DXpedition here this coming **February**. Al reports that tickets are purchased, and they should be there sometime **February 7th**. They will try to get set up to operate 160 meters at their sunset, about 0600z. Al states that 160m will be their priority, but they will also spend time on 80 and 40 meters plus 6 meters and other bands as time permits. Look for them everyday on the topband at 0600z until their sunrise at about 1700z. Antennas are a homebrew (by N7JW) top loaded vertical with lots of radials and beverages for RX. They will probably use a frequency above 1830 on topband and mostly CW on all bands but will let everyone know when they arrive. They will leave for home on **February 20th**. So they hope for a little luck and some decent band conditions. They want to put a lot of stations in the log, especially on the low bands and 6m too.
